

## Enable Mellanox Connect X support in OPNsense

Support for Mellanox Connect-X NICs aren't enabled on OPNsense by default.

The following line has to be added to `/boot/loader.conf.local`.

```
mlx4en_load="YES"
```

However this did not work for me and I had to add this from the web interface, System → Settings → Tunables.

### System: Settings: Tunables

Edit system tunable

|             |  |
|-------------|--|
| Tunable     | <input type="text" value="mlx4en_load"/> |
| Description | <input type="text"/>                     |
| Value       | <input type="text" value="YES"/>         |
